

Team Meeting Minutes: Meeting 01 Meeting Details

Project Title: Everyday Dilemma — Phishing Awareness Game

Timeline / Phase: Week 1 (Session 1 & 2) — Project Initiation & Ideation

Date & Time: 07 May 2026 | 10:00 AM – 12:30 PM (2.5 Hours)

Location: Room 208 (503 IT)

Meeting Chair: Sujal Pathak (Facilitator & Timekeeper)

Minute-Taker: Manish Thapa (Project Coordinator)

Attendance & Core Roles

Student Name

Designated Role

Sujal Pathak Meeting Chair

Manish Thapa Minute-Taker / Project Coordinator

Amrit Sharma Prototype Developer / GitHub Lead

Prajwal Shahi Game Design Lead / Research Lead

Shalu Tamang Group Leader / Content Lead

Agenda Items

Brainstorming & Concept Selection: Discuss and finalize the core theme of the project.

Role Distribution: Formally assign core responsibilities and roles to each team member.

Repository Setup: Establish the foundational Git workflow and project directory structure.

Target Audience Analysis: Identify who the game is for and what core problems it will solve.

Decisions MadeProject Direction: Agreed to build a web-based phishing awareness game titled "Everyday Dilemma" aimed at educating students on cybersecurity threats.

Game Mechanics: Decided that the game will use a scenario-based narrative approach where users make choices and see immediate consequences.

Development Stack: Agreed to use standard web technologies for early prototyping, with GitHub serving as the central version control and collaboration platform.

Role Confirmation: Formally approved the team roles listed in the attendance section above.

Action Items

Shalu Tamang Conduct initial research on common phishing tactics targeting students and draft preliminary content ideas.

Prajwal Shahi Create a rough concept map and initial user flow diagrams for the game layout.

Amrit Sharma Initialize the GitHub repository, configure access permissions for all members, and upload a basic .gitignore and README.md.

Manish Thapa Set up communication channels (e.g., Discord/Slack) and establish a shared drive for project documentation.

Sujal Pathak Draft the meeting agenda for Week 2 and prepare the schedule timeline for the upcoming design phase.

Next StepsRepository Verification:

All team members must successfully clone the newly created GitHub repository before the next session.

Scenario Ideation: Each member should think of 2-3 real-world phishing scenarios to bring to the next meeting for review.
