

Team Meeting Minutes: Meeting 06

Meeting Details Project Title: Everyday Dilemma — Phishing Awareness Game Timeline / Phase: Week 3 (Session 1 & 2) Date & Time: 21 May 2026 | 10:00 AM – 12:30 PM (2.5 Hours) Location: Room 208 (503 IT) Meeting Chair: Sujal Pathak (Facilitator & Timekeeper) Minute-Taker: Manish Thapa (Project Coordinator)

Attendance & Core Roles

| Student Name | Designated Role | Sujal Pathak Meeting Chair | Manish Thapa Minute-Taker / Project Coordinator | Amrit Sharma Prototype Developer / GitHub Lead | Prajwal Shahi Game Design Lead / Research Lead | Shalu Tamang Group Leader / Content Lead |

Agenda Items

The primary objective of this meeting was to update and refine the scenarios for the **PLAY** part of the game. The three selected student scenarios discussed are:

1. **Urgent Assignment Re-upload Email:** A high-pressure scenario targeting student anxiety around deadlines.
2. **Fake IT Support Password Reset:** A technical spoofing scenario impersonating institutional IT services.
3. **** fake tuition fee refund scam **** scenario simulating urgent financial fraud alerts.

Decisions Made

- **Gameplay Structure:** Agreed that the "PLAY" section will load a 3-stage branching narrative engine utilizing the three selected student scenarios listed in the agenda.
- **Technology Architecture:** Decided to implement image-based storytelling to visually display the game concepts, narrative choices, and outcomes. Feedback mechanisms were established to define exactly how consequences and educational takeaways will be displayed to the player.
- **Scoring Mechanics:** Approved a unified point system to track player performance:
 - +25 points for selecting safe/correct actions.
 - -5 points for selecting risky/compromised choices.

Action Items

- **Prajwal Shahi**

- Convert the conceptual storyboard into a concrete visual representation of the game.
- **Amrit Sharma**
 - Update the GitHub repository and refine the main README.md file.
 - Review the newly generated visuals of the game storyboard for technical implementation readiness.
- **Shalu Tamang**
 - Assign clear roles for the group members regarding upcoming tasks and the final presentation.
 - Finalize and sign off on the meeting agendas and key decisions.
- **Manish Thapa**
 - Outline the structure and slide content for the project presentation.
 - Maintain strict timekeeping logs for the sessions.
- **Sujal Pathak**
 - Act as meeting organizer, keeping all discussions focused on the agenda and ensuring all team members have the opportunity to speak.

Next Steps

1. **Asset Documentation:** Upload current wireframe layouts and asset screenshots directly to the designated repository folder: Week-3-Development-Testing/prototype-v2-evidence/.
2. **Code Repository Management:** Complete the functional structural framework files for Prototype Version 2 and execute an independent push to the repository before the start of the next session.
3. **Peer Review Prep:** Arrange a peer evaluation swap with another student group during the upcoming workshop session to fulfill and complete our system testing checkmarks.
