

Testing question	Yes/No	Evidence or notes
Does the prototype open/start correctly?	yes	 Prototype launches successfully without errors.
Is the welcome/title screen clear?	yes	 The title and welcome message are easy to read and understand.
Are the instructions easy to understand?	yes	

Testing question	Yes/No	Evidence or notes
		 Instructions clearly explain how to play the game.
Can the player identify what to click/do?	yes	 Buttons and interactions are obvious to the player.
Does the first cyber-safety challenge work?	yes	 The first challenge functions correctly and progresses properly.

Testing question	Yes/No	Evidence or notes
Does any new challenge/interaction work?	yes	 All newly added interactions respond as expected.
Does the correct answer show useful feedback?	yes	 Positive feedback explains why the answer is correct.

Testing question	Yes/No	Evidence or notes
Does the wrong answer show helpful feedback?	yes	 Incorrect answers provide hints and corrections.
Does the feedback teach a cyber-safety lesson?	yes	 Feedback reinforces important cyber- safety concepts.
Is there a reward, score, star, badge or progress message?	yes	 A progress/reward system is included to motivate players.
Is the prototype suitable for the target audience?	yes	The design and language are appropriate for the intended age group.

Testing question	Yes/No	Evidence or notes
What must be improved before next week?	yes	Add more challenges, improve visual design, and include more detailed feedback.
